SUMMARY

Senior Business Analyst & BI Specialist with 10+ years' experience delivering actionable insights, streamlining ETL pipelines, and driving strategic decisions through predictive analytics and data visualization. Skilled in SQL, Tableau, Power BI, and Python. Proven success in transforming reporting workflows, enabling data-driven decision-making, and collaborating across marketing, finance, and tech teams. Experienced in working with nonprofit, education, and advocacy organizations to scale data solutions. Looking to apply modern analytics capabilities to support global partner and sales ecosystems.

PROFESSIONAL EXPERIENCE

Self-Employed / Independent Contractor — 2024 to Present

Contract-based, Multi-Client Support Engagement

- Provided omnichannel customer support (phone, email) for a range of clients including Intuit (QuickBooks, TurboTax), IDX (identity protection services), and Oak Street Health (patient support).
- Delivered accurate and empathetic assistance, helping customers resolve financial, technical, and healthcare-related issues quickly and professionally.
- Provided HIPAA-compliant support for Oak Street Health, including handling sensitive patient data, reviewing prescription information, and managing healthcare-related workflows.
- Maintained performance metrics across multiple campaigns, including call resolution time, customer satisfaction (CSAT), and compliance adherence.
- Used internal CRM systems, knowledge bases, and custom tools to document interactions, escalate issues, and support patient-facing workflows.
- Managed transportation logistics coordination for Alivi Health, scheduling non-emergency medical transportation for Medicare/Medicaid patients and resolving dispatch issues with ride providers.
- Adapted quickly across different client tools, systems, and workflows while handling sensitive financial and health-related information in line with HIPAA and security standards.

Southern New Hampshire University – 2013 to 2024

Adjunct Instructor and Team Lead *responsible for teaching online Information Technology courses and evaluating instructor performance*

- **Business Intelligence and Reporting:** Taught and developed curriculum for Business Systems Analysis and Design and Business Intelligence and Reporting courses, focusing on data visualization, statistical analysis, and data-driven decision-making using tools like Tableau, Power BI, and SQL.
- **Predictive Analytics and Data Modeling:** Led hands-on projects guiding students in the use of predictive analytics, data modeling, and data mining techniques to solve real-world business problems.
- **Data Warehousing and ETL Processes:** Delivered instruction on data warehousing, ETL processes, and database management, providing a strong foundation in structured data analysis and optimization.
- **Data Analysis:** Integrate cutting-edge data analysis tools into the curriculum, ensuring alignment with industry standards in big data and data-driven business solutions.
- **Collaboration:** Evaluate instructor performance as Team Lead to ensure active course participation, engagement outreach, and responsiveness to student needs.

Rise Inc. – 2022

Data Manager *responsible for streamlining the data analysis and reporting process*

- **Data Management and Real-Time Tracking:** Implemented a new process for managing and organizing the data sets to track the get-out-the-vote campaigns that provided real-time updates.
- **Workflow Development and Database Tools:** Developed workflows for tracking canvassing activities and performance by building and deploying database tools and reporting replacing Excel data entry.
- **Automation of Reporting Processes:** Automated daily report delivery process to identify trends with organizing programs data collection to both national and state staff replacing manual efforts.
- **ETL Processes and Data Quality Control:** Established ETL processes to improve quality control of user data leveraging SQL and database tools.

iQ Media, Inc. – 2015 to 2016

Reporting Analyst *responsible for streamlining the analysis and reporting process and creating proof of concept reports*

- **Media Campaign Analysis and Insights:** Delivered actionable insights on multi-channel campaign performance by identifying key performance drivers across media types—enabled sales and marketing to optimize spend, contributing to 5% increase in new business.
- **Sales Support and Business Growth:** Developed proof of concept sample reports to support the sales team to leading to a 5% increase in new business.
- **SQL Development and Data Quality Assurance:** Developed SQL scripts to resolve data quality issues, including data validation and cleansing procedures to ensure accuracy and integrity of reported data.
- **ETL Process Implementation:** Reduced data processing time by 30% and increased efficiency in generating reports by implementing ETL processes.

Proximo, Inc. – 2012 to 2014

Business Analyst / Project Manager *responsible for gathering user requirements and leading data analysis projects*

- **Society for Neuroscience (SFN):** Collaborated closely with SFN's cross-functional teams in documenting requirements, data structures, and process flows to determine KPIs and to make data warehouse and business intelligence tools recommendations which led to discovering duplication of processes and data.
- **The Casket and Funeral Supply Association (CFSA):** Managed a project that required gathering requirements, tracking activities and schedule and working closely with project team members to deliver a brand-new cloud-based member credit reporting application which increased efficiency, reduced manual reporting and improved member satisfaction.
- **Asia Society:** Elicited requirements from the Asia Society Team and managers by capturing employee survey and reporting and analysis requirements and resulting in automating company survey judging packets and company reports to reduce delivery time by five days ahead of schedule.
- **Copper Development Association, Inc. (CDA):** Developed test cases aligned with business requirements for web services project to improve search capabilities on client website resulting in increased delivery efficiency.

Earthlink, Inc., – 2005 to 2006

BI Reporting Analyst *responsible for providing analysis and reporting for cross-functional teams*

- **Automation and Reporting:** Drove initiatives to enhance automation for data reporting across the organization, which eliminated manual tasks related to business operations and reduced report generation time by 10% and improving collaboration.
- **Collaboration and Decision Support:** Collaborated with the Marketing, Sales, and Finance departments to solicit reporting requirements and improve decision-making and meeting company goals.
